

Banner Health Network

About Banner Health Network

The Banner Health Network (BHN) is comprised of Banner-affiliated physicians, Banner hospitals and other Banner services in Arizona. The network has more than 2,600 employed and private physicians conveniently located throughout Maricopa County and into Pinal County. BHN is a comprehensive provider network that accepts patient care and financial risk responsibility for those served by the network. It is one of a few networks in Arizona serving patients in a population health management model. This model offers a highly coordinated patient experience through a primary care setting that seeks to improve patient outcomes, control costs and emphasize wellness.

Integrated delivery of care

A foundation of the Banner Health Network's ability to deliver highly coordinated patient care is an electronic medical records system that is utilized for every patient who receives care at a Banner hospital. Wherever a patient goes within the Banner Health Network, information about care they have received is available.
