MEANINGFUL USE STAGE 2 INTRODUCTION

This guide contains scenario-based examples of the workflow needed to become compliant for Meaningful Use Stage 2 measures. Some of the most common scenarios are outlined here, although the methods used may not always be the only way to complete a given task.

Note: It is required that the technology certified for 2014 is used to satisfy these measures. Version 10 of eClinicalWorks is the 2014 certified technology.

The Final Rule Meaningful Use objectives are split into three groups:

- Core Objectives These 17 objectives must all be satisfied in to fulfill the Meaningful Use requirements.
- Menu Set Objectives Providers can select three (3) out of these six (6) objectives that they wish to satisfy
 to fulfill the Meaningful Use requirements.

Note: While there are exclusions provided for some of the Menu Set objectives, users cannot select one of these objectives and claim the exclusion if there are other Menu Set objectives that they can report on instead.

Clinical Quality Measures - Formerly a Core Measure, it has been removed as redundant, but providers are still required to report on Clinical Quality Measures to achieve Meaningful Use. Beginning in 2014, eligible professionals must select and report on nine (9) of a possible list of 64 approved CQMs for the EHR Incentive Programs. There is also a new requirement in 2014 that the CQMs selected must cover at least three (3) of the six (6) available National Quality Strategy (NQS) domains

IMPORTANT! There are two types of measures: percentage-based and self-attest. Self-attest measures require users to meet the criteria and report with a Yes or No while percentage-based measures require calculations to determine the numerator and denominator. The MAQ Dashboards are a reporting tool that can be used to determine how well you are satisfying the percentage based Meaningful Use measures with eClinicalWorks.

The recommended methods of satisfying Meaningful Use measures are detailed in this guide, but there may be other methods of satisfying certain measures using the eClinicalWorks EMR/PM system. For more information on all features available when using eClinicalWorks, refer to the HelpHub, which can be accessed from within the eClinicalWorks application at: Help > HelpHub.

Certain Visit Types, Visit Statuses, and patients are excluded from all Meaningful Use calculations. For more information on the processes related to excluding visits, statuses, and patients, refer to the following sections:

- Excluding Visit Types from Meaningful Use Calculations
- Excluding Visit Statuses from Meaningful Use Calculations
- Excluding Inactive and Deceased Patients from Meaningful Use Calculations

Note: Visit Type and Visit Status exclusions only affect Core and Menu Set objective measures and not Clinical Quality Measures.

Excluding Visit Types from Meaningful Use Calculations

Certain visit types can be automatically excluded from Meaningful Use calculations. Any visits with these visit types are ignored by the system when calculating compliance percentages for all measures.

IMPORTANT! If providers are seeing patients using a visit type, then it should not be excluded from reporting.

To exclude visit types from Meaningful Use calculations:

- From the *Admin* band in the left navigation pane, click *Admin*.
 The Admin login window opens.
- Enter your administrator password and click *Login*.
 The Admin window opens.
- Click the *User Admin* folder in the left pane.
 The items in the User Admin folder display in the left pane.
- 4. Click *Visit Type Codes* in the left pane.The Visit Type Codes options display in the right pane.
- 5. Click Add.

The Visit Codes options display in the right pane.

6. Check the Exclude from Meaningful Use Reporting box:

/isit Codes

Jave	

- 7. Enter any remaining information here as appropriate.
- 8. Click Save.

This new Visit Type is created. Any encounter using this Visit Type is not included in the calculations for any Meaningful Use measure.

Excluding Visit Statuses from Meaningful Use Calculations

Certain visit statuses can be automatically excluded from Meaningful Use calculations. Any visits with these visit statuses are ignored by the system when calculating compliance percentages for all measures.

To exclude visit statuses from Meaningful Use calculations:

- From the *Admin* band in the left navigation pane, click *Admin*. The Admin login window opens.
- Enter your administrator password and click *Login*. The Admin window opens.
- Click the *User Admin* folder in the left pane.The items in the User Admin folder display in the left pane.
- Click *Visit Status Codes* in the left pane.
 The Visit Status Codes options display in the right pane.
- 5. Click Add.

The Visit Codes options display in the right pane.

6. Check the *Exclude from Meaningful Use Reporting* box:

	3(8(03	000

• Billable • Non Billable		
Exclude from Meaningful U	se Reporting	
Trigger Demographic Mand	latory Field Check	

- 7. Enter the rest of the information here as appropriate.
- 8. Click Save.

This new Visit Status is created. Any encounter using this Visit Status is not included in the calculations for any Meaningful Use measure.

Excluding Inactive and Deceased Patients from Meaningful Use Calculations

Any patients that are marked as Inactive or Deceased are excluded from Meaningful Use calculations.

Marking a Patient as Inactive

Patients that no longer go to your practice may be marked as Inactive from the Patient Information window.

To mark a patient as Inactive:

- 1. Click the Patient Lookup icon at the top of the application.
- The Patient Lookup window opens.
- 2. Search for and highlight the inactive patient, then click *Patient Info*.The Patient Information window opens.
- 3. Click Additional Info.

The additional Patient Information window opens.

4. Check the *Inactive* box:

5. Click OK.

The additional Patient Information window closes.

6. Click OK.

The Patient Information window closes and this patient is marked Inactive.

Marking a Patient as Deceased

Deceased patients may be marked as such from the Patient Information window.

To mark a patient as deceased:

- Click the Patient Lookup icon at the top of the application. The Patient Lookup window opens.
- 2. Search for and highlight the inactive patient, then click *Patient Info*.The Patient Information window opens.
- 3. Click Additional Info.

The additional Patient Information window opens.

4. Check the *Deceased* box.

The Date and Notes fields display in the Deceased section:

- 5. Enter the date this patient died in the *Date* field (in mm/dd/yyyy format).
- 6. Enter any applicable notes concerning this patient's death (such as the manner) in the *Notes* field.
- 7. Click OK.

The additional Patient Information window closes.

8. Click OK.

The Patient Information window closes and this patient is marked Deceased.

Requesting a Direct Address

A Direct Address is required for practices to electronically transmit clinical information to a third party. This is necessary to satisfy aspects of Core Measure 15, and can also optionally be used for Core Measure 7.

Note: Non-eCW providers can go to <u>http://www.jointhenetwork.com</u> to request an eClinicalWorks-issued Direct Address.

To request a Direct Address:

1. From the Admin band, click eCW P2P Admin:

The P2P Admin window opens.

2. If you are already on Join the Network (JTN), click *Edit Settings*:

Out-of-Network Exchange:

For communication and data exchange with out-of-network providers who have a Direct Address. Please complete the form below and we will contact you shortly for the setup of the Out-of-Network Exchange.

Submit

The HISP - Direct status is marked as Pending. A Direct Address is issued within five (5) business days. Once issued, the HISP-Direct status is marked as Confirmed.

CORE MEASURES

All 17 of these objectives must be satisfied in order to fulfill the Meaningful Use requirements. The following objectives are Core Measures:

- Core 1: Using CPOE for Medication, Laboratory, and Radiology Orders
- Core 2: Generating and Transmitting e-Prescriptions
- Core 3: Recording Demographics
- Core 4: Recording Vital Signs
- Core 5: Recording Smoking Status
- Core 6: Clinical Decision Support Rule
- Core 7: Patient Electronic Access
- Core 8: Providing Clinical Summaries
- Core 9: Protect Electronic Health Information
- Core 10: Incorporating Lab Test Results as Structured Data
- Core 11: Patient Lists
- Core 12: Preventive Care
- Core 13: Patient-Specific Education Resources
- Core 14: Medication Reconciliation
- Core 15: Summary of Care
- Core 16: Submitting Electronic Data to Immunization Registries
- Core 17: Use Secure Electronic Messaging

Note: For more information on all features referenced in this guide, refer to the HelpHub, which can be accessed from within the eClinicalWorks application from the Help menu.

Core 1: Using CPOE for Medication, Laboratory, and Radiology Orders

Objective

Use computerized provider order entry (CPOE) for medication, laboratory and radiology orders directly entered by any licensed healthcare professional who can enter orders into the medical record per state, local and professional guidelines.

Measure

More than 60 percent of medication, 30 percent of laboratory, and 30 percent of radiology orders created by the EP during the EHR reporting period are recorded using CPOE.

IMPORTANT! To restrict non-licensed healthcare professionals from entering orders on your behalf, ensure that the security setting *Treatment - Allows access to the treatment plan from Progress Notes* is unchecked for those non-licensed users. This restricts their access to the Treatment section on the Progress Notes.

Core 1-1

Denominator

Medications are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have been created with a Start status by an EP or a member of the EP's staff during the reporting period.	 Record this information from the following locations: Progress Notes > Treatment > Add Telephone/Web Encounter > Rx tab > Select Rx Telephone/Web Encounter > Virtual Visit tab > Treatment > Add
	Note: CPOE involves all methods of recording medications in a structured manner. This includes any use of Order Sets, Templates, e-Prescription, eCliniSense, and any other methods of manually ordering medications on the Treatment window of Progress Notes or the Rx tab/Virtual Visit Treatment section of a Telephone/Web Encounter

Numerator

Medications that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have been entered by a licensed healthcare professional or credentialed medical assistant.	 Record this information from the following locations: Admin > Staff > select staff member > check the Licensed Medical Professional or Credentialed Medical Assistant box Progress Notes > Treatment > Add Telephone/Web Encounter > Rx tab > Select Rx Telephone/Web Encounter > Virtual Visit tab > Treatment > Add

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have ordered less than 100 medications during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 1-1

The following features are related to satisfying Core Measure 1-1:

- Recording Medications
- Setting Up Staff Members as Licensed Healthcare Professionals/Credentialed Medical Assistants

Core 1-2

Denominator

Diagnostic Imaging orders are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have been created by an EP or a member of the EP's staff during the reporting period.	 Record this information from the following locations: Progress Notes > Diagnostic Imaging Progress Notes > Treatment > Browse in the Diagnostic Imaging section Telephone/Web Encounter > Labs/DI tab > select Imaging from drop-down list > New Telephone/Web Encounter > Virtual Visit tab > Diagnostic Imaging Telephone/Web Encounter > Virtual Visit tab > Treatment > Browse in the Diagnostic Imaging section Prelephone/Web Encounter > Virtual Visit tab > Treatment > Browse in the Diagnostic Imaging section Patient Hub > DI > New

Numerator

Diagnostic Imaging orders that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have been entered by a licensed healthcare professional or credentialed medical assistant.	 Record this information from the following locations: Admin > Staff > select staff member > check the Licensed Medical Professional or Credentialed Medical Assistant box
	 Progress Notes > Diagnostic Imaging Progress Notes > Treatment > Browse in the Diagnostic Imaging section Telephone/Web Encounter > Labs/DI tab > select Imaging from
	 drop-down list > New Telephone/Web Encounter > Virtual Visit tab > Diagnostic Imaging
	 Telephone/Web Encounter > Virtual Visit tab > Treatment > Browse in the Diagnostic Imaging section Patient Hub > DI > New

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have ordered less than 100 diagnostic imaging orders during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 1-2

The following features are related to satisfying Core Measure 1-2:

Core 2: Generating and Transmitting e-Prescriptions

Objective

Generate and transmit permissible prescriptions electronically (eRx).

Measure

More than 50 percent of all permissible prescriptions, or all prescriptions, written by the EP are queried for a drug formulary and transmitted electronically using CEHRT.

Note: Based on additional clarification from CMS, Rx eligibility must be verified prior to e-prescribing (including responding to refill requests) to get credit for this measure.

This change is effective for the May 1, 2015 reporting period; past data will not be affected. Per this clarification, eligibility checks performed on past prescriptions cannot be reused since the formulary could have changed. A new eligibility check must be performed each time (or within three days before the prescription date) to retrieve the latest formulary information prior to e-prescribing or responding to refill requests.

Failure to follow the recommended workflow to perform eligibility checks for each prescription and refill request will result in a drop in numerator numbers for this measure.

If provider performance rates have dropped for this measure, it could be the result of one of the following reasons:

- Recommended workflow to perform eligibility checks prior to each e-prescription or response to refill requests is not being followed.
- Eligibility checks have not been performed for prescriptions and refill requests in the reporting period.

Denominator

Prescriptions are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have been printed, faxed, or transmitted electronically	 Record this information from the following locations: Progress Notes > Treatment Telephone/Web Encounter > Rx Tab Telephone/Web Encounter > Virtual Visit tab > Treatment
	 IMPORTANT! The following medications are excluded from being included in the denominator: Duplicate medications (re-printed, re-faxed, re-transmitted, or printed and also transmitted) Non-permissible (controlled) medications

Numerator

Prescriptions that satisfy the denominator are included in the numerator if they satisfy all of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have been queried for a drug formulary from the Rx Eligibility window.	 Record this information from the following locations: Progress Notes > Treatment > green arrow next to Send Rx > ePrescribe Rx > Rx Eligibility Appointment window > Rx Eligibility > Check Rx Eligibility Progress Notes > Treatment > Add > Rx Eligibility > Check Rx Eligibility: Telephone/Web Encounter > Rx tab > Rx Eligibility > Check Rx Eligibility Telephone/Web Encounter > Telephone/Web Encounter > Rx tab > green arrow next to Send Rx > ePrescribe Rx > Rx Eligibility eRefill > Rx Eligibility > Check Rx Eligibility
	 IMPORTANT! Rx eligibility must be verified for all patients, including self-pay patients, every time a prescription is sent. Whenever an Rx Eligibility check is performed in eClinicalWorks, the check lasts for three (3) days. Prescriptions and refill requests created within the three days after an eligibility check has been performed are considered verified. Any prescription or refill request created after these three days requires that a new eligibility check be performed in order to satisfy this measure.
	Note: A Scheduled Job can also be run every night (for scheduled appointments only). You must verify Rx Eligibility manually before e-Prescribing for walk-in appointments, Telephone/Web Encounter orders, and eRefill requests
They have been transmitted using e-Prescription from the ePrescribe Rx window	 Record this information from the following locations: E quick-launch link > Refill Rx or Error/Failed Rx Progress Notes > Treatment > green arrow next to Send Rx > ePrescribe Rx Telephone/Web Encounter > Rx tab > green arrow next to Send Rx > ePrescribe Rx Telephone/Web Encounter > Virtual Visit > Treatment> green arrow next to Send Rx > ePrescribe Rx Telephone/Web Encounter > Virtual Visit > Treatment> green arrow next to Send Rx > ePrescribe Rx

Exclusions

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They write fewer than 100 permissible prescriptions during the EHR reporting period.	This exclusion criteria is reported by self-attestation.
They do not have a pharmacy within their organization and there are no pharmacies that accept electronic prescriptions within 10 miles of the EP's practice location at the start of his/her EHR reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 2

The following features are related to satisfying Core Measure 2:

- Transmitting Prescriptions
- Checking Rx Eligibility
- e-Prescribing Medications

Transmitting Prescriptions

Core 3: Recording Demographics

Objective

Record the following demographics: preferred language, sex, race, ethnicity, and date of birth.

Measure

More than 80 percent of all unique patients seen by the EP have demographics recorded as structured data.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if all of the following information is recorded for them:

Numerator Criteria	Area to Document within eClinicalWorks
They have had their date of birth, gender (sex), language, race, and ethnicity entered in patient demographics.	 Record this information from the following locations: Community > Mappings > Language Patient Information > Date of Birth and Sex Patient Information > Additional Info > Race, Ethnicity, and Language
	Note: Preferred languages must be recorded in accordance with ISO 639-2 alpha-3 codes standards.

Features Related to Core 3

The following features are related to satisfying Core Measure 3:

- Recording Appointments
- Recording E&M Codes
- Mapping Community Languages
- Recording Demographic Information

Recording Appointments

Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment

Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment

Recording E&M Codes

Progress Notes > Visit Code > Add E&M

Mapping Community Languages

This is a one-time setup that must be performed for each language used:

Core 4: Recording Vital Signs

Objective

Record and chart changes in the following vital signs: height/length and weight (no age limit); blood pressure (ages 3 and over); calculate and display body mass index (BMI); and plot and display growth charts for patients 0-20 years, including BMI.

Measure

More than 80 percent of all unique patients seen by the EP have blood pressure (for patients aged three years and over only) and/or height and weight (for all ages) recorded as structured data.

Core 4-1

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have had their height, weight, and blood pressure recorded (blood pressure is only applicable to patients three years of age and older)	 Record this information from the following locations: EMR > Vitals > Configure Vitals Progress Notes > Vitals
	Note: The required vitals do not all have to be recorded in the same encounter, nor do they have to be recorded during the reporting period. They can be recorded over multiple encounters at any time, as long as all three are recorded during office visits.
	IMPORTANT! These Vitals categories must be associated with the corresponding Vital Types (from EMR > Vitals > Configure Vitals) for patients to be counted in the numerator.

Exclusions

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They believe all three vital signs (height, weight, and blood pressure) are not relevant to the scope of their practice	This exclusion criteria is reported by self-attestation.

Features Related to Core 4-1

The following features are related to Core Measure 4-1:

- Recording Appointments
- Recording E&M Codes
- Configuring Vitals
- Recording Height, Weight, and Blood Pressure

Recording Appointments

Core 5: Recording Smoking Status

Objective

Record smoking status for patients 13 years old or older.

Measure

More than 80 percent of all unique patients 13 years old or older seen by the EP have smoking status recorded as structured data.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have had their smoking status recorded as structured data.	Configure options related to this measure from the following locations: Community > Mappings > Structured Data OR Community > Mappings > Smart Forms Record this information from the following locations: Progress Notes > Social History OR Progress Notes > SF drop-down list > Tobacco Control
	 IMPORTANT! The following options satisfy this measure: Current smoker Heavy tobacco smoker Light tobacco smoker Former smoker Never smoker Current every day smoker Current some day smoker Smoker, current status unknown Unknown if ever smoked Note: The Tobacco Use Smart Form can also be used to satisfy this measure.

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They performed no encounters for patients over the age of 13 during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 5

The following features are related to Core Measure 5:

- Recording Appointments
- Recording E&M Codes

- Mapping Community Structured Data
- Mapping Smart Forms
- Recording Smoking Status

Core 6: Clinical Decision Support Rule

Objective

Use clinical decision support to improve performance on high-priority health conditions.

Measure 1

Implement five clinical decision support interventions related to four or more clinical quality measures at a relevant point in patient care for the entire EHR reporting period. Absent four clinical quality measures related to an EP's scope of practice or patient population, the clinical decision support interventions must be related to high-priority health conditions.

Measure 2

The EP has enabled and implemented the functionality for drug-drug and drug-allergy interaction checks for the entire EHR reporting period.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Core 6 Measure 1

The following features are available to assist in decision-making:

Feature	Area to Document within eClinicalWorks
Classic Alerts	EMR > Alerts
Registry Alerts	Registry band > Registry icon > run a query > Save Queries
CDSS Alerts	EMR > CDSS > Measure Configuration

Note: For more information on using these features, refer to the *Electronic Medical Records Users Guide* or the HelpHub.

Features Related to Core 6 Measure 1

The following features are related to Core 6 Measure 1:

- Configuring Classic Alerts
- Configuring Registry Alerts
- Configuring CDSS Alerts

Configuring Classic Alerts

This is a one-time setup process, with periodic maintenance as needed:

EMR > Alerts

Core 7: Patient Electronic Access

Objective

Provide patients the ability to view online, download, and transmit their health information within four business days of the information being available to the EP.

Core 7-1

Measure

More than 50 percent of all unique patients seen by the EP during the EHR reporting period are provided timely (available to the patient within four (4) business days after the information is available to the EP) online access to their health information.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have been web-enabled any time before, during, or within four (4) business days of the appointment.	 Record this information from one of the following locations: Patient Information > Options > Web Enable Appointment window > W check box
The patient is unwilling to disclose their e-mail address.	Patient Information > Additional Info > Email drop-down list and Not Provided check box

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They neither order nor create any of the information listed for inclusion as part of this measure, except for <i>Patient name</i> and <i>Provider's name</i> and office contact information, may be excluded from this measure.	This exclusion criteria is reported by self-attestation.

Features Related to Core 7-1

Core 7-2

Measure

More than five (5) percent of all unique patients seen by the EP during the EHR reporting period (or their authorized representatives) view, download, or transmit their health information to a third party.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have viewed their health information by logging into the Patient Portal	Web browser > URL > enter information in Username and Password fields > Sign In
They have downloaded their PHR or Visit Summary from the Patient Portal	Patient Portal > left navigation menu or Request PHR button
They have transmitted their health information to a third party from one of the links in the Medical Records section of the left navigation pane on the Patient Portal	Patient Portal > Medical Record > Personal Health Share > Share
	IMPORTANT! Transmitting health information to a third party requires the patient to enter the direct address of the provider. Providers can request direct address after enrolling in JTN (Join the Network) from the following web address: <u>https://</u> <u>my.eclinicalworks.com/eCRM/jsp/</u> <u>productJoinTheNetwork.jsp?pgId=7&prodId=3</u> . For more information, refer to Requesting a Direct Address.

Note: For more information on the options available to patients from the Patient Portal, refer to the *Patient Portal Users Guide* or the HelpHub.

Exclusions

Providers may be excluded from this measure under the following circumstances:

Exclusion Criteria	Area to Document within eClinicalWorks
They neither order nor create any of the information listed for inclusion as part of this measure, except for <i>Patient name</i> and <i>Provider's name</i> and office contact information.	This exclusion criteria is reported by self-attestation.
They conduct 50 percent or more of their patient encounters in a county that does not have 50 percent or more of its housing units with 3Mbps broadband availability, according to the latest information available from the FCC on the first day of the EHR reporting period.	This exclusion criteria is reported by self-attestation. Information on broadband availability can be found at: <u>http://www.broadbandmap.gov/</u>

Core 8: Providing Clinical Summaries

Objective

Provide clinical summaries for patients for each office visit.

Measure

Clinical summaries provided to patients or patient-authorized representatives within one business day for more than 50 percent of office visits.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they meet ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have a printed visit summary within one (1) business day (excluding federal, but not state, holidays) of their encounter.	 Record this information from the following locations: Progress Notes > arrow next to the Print button > Print Visit Summary > Print Options > Print Preview or Decline Practice band > Resource/Provider Scheduling icon > right-click on appointment > Print Visit Summary > Print Preview or Decline Progress Notes > Send IMPOPTANTI Printing the Progress Notes does NOT satisfy this
	measure. The Visit Summary must be printed to receive credit.
They have been web-enabled before, during, or within one (1) business day (excluding federal, but not state, holidays) of their encounter	 Record this information from the following locations: Admin > Patient Portal Settings > Feature Settings Patient Information > Options > Web Enable Appointment window > W check box

Exclusion

Providers are excluded from satisfying this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have no appointments recorded during the reporting period.	This exclusion criteria is reported by self-attestation.

Core 9: Protect Electronic Health Information

Objective

Protect electronic health information created or maintained by the Certified EHR Technology through the implementation of appropriate technical capabilities.

Measure

Conduct or review a security risk analysis in accordance with the requirements under 45 CFR 164.308(a) (1), including addressing the encryption/security of data stored in CEHRT in accordance with requirements under 45 CFR 164.312 (a)(2)(iv) and 45 CFR 164.306(d)(3), and implement security updates as necessary and correct identified security deficiencies as part of the provider's risk management process for EPs.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Note: Regardless of whether a practice is locally hosted or hosted in the cloud, a Security Risk Assessment must be conducted by each practice at least once every year.

The following features are available to *assist* in protecting electronic health information:

Feature	Area to Document within eClinicalWorks
Security Attributes	File > Security Settings
Rx Security	File > Security Settings > Rx Security
P.S.A.C.	 Access this feature from one of the following locations: File > P.S.A.C. Settings > New File > P.S.A.C. Settings > select group name > assign members > Save File > P.S.A.C. Settings > select group name > Advanced Settings
Confidential Progress Notes	Progress Notes > Visit Code > Confidential Note
Confidential Patient Accounts	Patient Information > P.S.A.C.
Authentication Settings	File > Settings > Authentication Settings

Core 10: Incorporating Lab Test Results as Structured Data

Objective

Incorporate clinical lab test results into Certified EHR Technology as structured data.

Measure

More than 55 percent of all clinical lab tests results ordered by the EP during the EHR reporting period whose results are either in a positive/negative or numerical format are incorporated in Certified EHR Technology as structured data.

Denominator

Clinical labs are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have been ordered and had results recorded during the reporting period	 Record this information from the following locations: L jellybean > New > Lab > Sel Progress Notes > Treatment > Browse button in the Labs section > Lookup Progress Notes > Lab Reports > Lookup Patient Hub > Labs > New > Sel Telephone/Web Encounter > Labs/DI tab > select Labs from drop-down list > New > Sel Telephone/Web Encounter > Virtual Visit tab > Treatment > Browse button in the Labs section > Lookup Telephone/Web Encounter > Virtual Visit tab > Treatment > Browse button in the Labs section > Lookup
	IMPORTANT! A lab is only considered to be ordered for your patient if you are listed as the Ordering Provider.
	IMPORTANT! Labs in the Microbiology category are excluded from this calculation. Labs can be associated with categories from: EMR > Labs, DI & Procedures > Labs > search for and highlight a lab > green arrow next to the New button > Update > Associate Category

Numerator

Clinical labs in the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have results entered and are	 Record this information from the following locations: L jellybean > click on lab Progress Notes > Treatment > Lab link Progress Notes > Lab Reports > Lab link Progress Notes > right Chart Panel > Labs/DI tab > click on lab Patient Hub > Labs > click on lab Telephone/Web Encounter > Labs/DI tab > click on lab Telephone/Wen Encounter > Virtual Visit tab > Treatment > Lab
marked as received from the Lab	link Telephone/Wen Encounter > Virtual Visit tab > Lab Reports > Lab
Results window.	link

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have not ordered any tests with results that are either in a positive/negative or numeric format during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 10

Core 11: Patient Lists

Objective

Generate lists of patients by specific conditions to use for quality improvement, reduction of disparities, research, or outreach.

Measure

Generate at least one report listing patients of the EP with a specific condition.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

The following features are available to *assist* in generating lists:

Feature	Area to Document within eClinicalWorks
Registry	 Access this information from the following locations: Registry band > Registry icon > run a query > Save Queries
	 Registry band > Registry icon > Analyze Data > Copy

Note: For more information on how to use these features, refer to the *Electronic Medical Records Users Guide* or the HelpHub.

Features Related to Core 11

Core 12: Preventive Care

Objective

Use clinically relevant information to identify patients who should receive reminders for preventive/follow-up care and send these patients the reminders, per patient preference.

Measure

More than 10 percent of all unique patients who have had 2 or more office visits with the EP within the 24 months before the beginning of the EHR reporting period were sent a reminder, per patient preference when available.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had at least two (2) outpatient appointment with a valid CPT* code created for them with an eligible professional within 24 months before the start of the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy at least ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They are sent a follow-up, health maintenance, or preventive care letter reminder.	 Record this information from the following locations: Patient Hub > Messenger > Messenger Configuration Patient Information > Speaker icon Registry band > Patient Recall icon > generate/select a list of patients > click More () next to the letter field > select a template > Run Letter > Print Registry band > Lookup Encounter icon > generate/select a list of patients > click More () next to the letter field > select a template > Run Letter > Print Registry band > Lookup Encounter icon > generate/select a list of patients > click More () next to the letter field > select a template > Run Letter > Print Registry band > Registry icon > generate/select a list of patients > click More () next to the letter field > select a template > Run Letter > Print Patient Hub > Letters > generate/select a list of patients > click More () next to the letter field > select a template > Run Letter > Print
	IMPORTANT! Only letters using templates that have been configured as Follow-Up, Health Maintenance, or Preventive Care satisfy this measure. Letter template categories are configure from the following location: Registry band > Registry icon > click More () next to the letter field > select a letter > New or Update > Category
They are sent a health maintenance voice or text message.	 Record this information from the following locations: Practice band > Resource Scheduling icon > Bump Appointment icon > Messenger Patient Hub > Messenger > Send Message Registry band > Patient Recall icon > Messenger Registry band > Lookup Encounters icon > Messenger Registry bad > Registry icon > Messenger Practice band > Office Visits icon > Messenger S jellybean > Messenger Practice band > Resource Scheduling icon > right-click on an appointment > Messenger Practice band > Telephone/Web Encounter icon > Messenger T jellybean > Messenger Practice Band > Labs/Imaging icon > Messenger L jellybean > Messenger

Numerator Criteria	Area to Document within eClinicalWorks
	IMPORTANT! Messages must be Health Maintenance message types to satisfy this measure.
	IMPORTANT! eClinicalWorks Messenger must be enabled and configured to use this feature. For more information, refer to the <i>eClinicalWorks Messenger Users Guide</i> .
They are sent a preventive or follow-up care e-message.	 Record this information from the following locations: Patient Hub > Send eMsg Registry band > Patient Recall icon > eMsg Registry band > Lookup Encounters icon > Send eMsg Registry band > Lookup Encounters icon > Blast eMsgs Registry band > Registry icon > Send eMessage
They are sent an alert reminder enabled for the Patient Portal.	Admin band > Patient Portal Settings icon > Feature Settings

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have had no office visits in the 24 months before the EHR reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 12

The following features are related to Core Measure 12:

- Recording Appointments
- Recording E&M Codes
- Recording Patients' Message Preferences
- Sending Letter Reminders
- Configuring Letter Categories
- Sending Voice or Text Message Reminders
- Sending eMessages
- Configuring Alert Reminders on the Patient Portal

Recording Appointments

Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment

Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment

Recording E&M Codes

Progress Notes > Visit Code > Add E&M

.

Recording Patients' Message Preferences

Core 13: Patient-Specific Education Resources

Enhanced Feature

Objective

Use clinically relevant information from Certified EHR Technology to identify patient-specific education resources and provide those resources to the patient.

Measure

Patient-specific education resources identified by Certified EHR Technology are provided to patients for more than 10 percent of all unique patients with office visits seen by the EP during the EHR reporting period.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy at least ONE of the following criteria:

Area to Document within eClinicalWorks
 Record this information from the following locations: Progress Notes > Treatment > Education > Rx Education > Medications (English) or Medications (Spanish) > View Rx Education > Print Progress Notes > Treatment > Education > Patient Education > Print* Progress Notes > Treatment > Education > Patient Education >
 Publish to Portal check box* Progress Notes > Treatment > OS icon > Patient Education > PDF or Web Reference > Order Progress Notes > Send > For Patients
IMPORTANT! Custom education given through Progress Notes > Treatment > Education > Custom Education does not count toward the numerator because it does not use patients' clinical information stored in the CEHRT to identify that resource.
Note: In May 2015, per CMS FAQ 8231, this measure was modified to consider education material given in the year 2015 to receive credit for the numerator. Any material given prior to 2015 was not considered in the numerator calculations. CMS has revoked this FAQ until further notice, and as per CMS, the measure calculations must be reverted to the specifications prior to the FAQ 8231 release. The change now states that education material given any time prior to the attestation date satisfies this numerator. This change will be released in late July 2015. Please refer to <u>my.eclinicalworks.com</u> for updates as they become available.

Users must be signed up with one of the education partners to have access to Patient Education * feature. For EPs attesting after Q2 2014, all of eClinicalWorks' education vendors (which includes Healthwise, ADAM, and Krames) are 2014-certified.

Core 14: Medication Reconciliation

Objective

The EP who receives a patient from another setting of care or provider of care or believes an encounter is relevant should perform medication reconciliation.

Measure

The EP who performs medication reconciliation for more than 50 percent of transitions of care in which the patient is transitioned into the care of the EP.

Denominator

Patients are included in the denominator if they satisfy ALL of the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an appointment created for them with the <i>Transition of care</i> box checked during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on time slot > New Appointment > Transition of Care check box Practice band > Resource Scheduling icon > double-click on appointment > Transition of Care check box Practice band > Provider Schedule icon > right-click on time slot > New Appointment > Transition of Care check box Practice band > Provider Schedule icon > right-click on time slot > New Appointment > Transition of Care check box Practice band > Provider Schedule icon > double-click on appointment > Transition of Care check box Practice band > Provider Schedule icon > double-click on appointment > Transition of Care check box Progress Notes > Chief Complaints > Transition of Care check box
They have a valid Outpatient CPT* code recorded for the <i>Transition of care</i> appointment.	Progress Notes > Visit Code > Add E&M

CPT copyright 2014 American Medical Association. All rights reserved.

Note: Telephone Encounters are not counted as appointments. Patients with only Telephone Encounters are not included in the denominator for this measure.

Numerator

Patients in the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
Their medications are reconciled and marked as verified.	Progress Notes > Current Medication > Verified check box

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They were not the recipient of any transitions of care during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 14

The following features are related to Core Measure 14:

Core 15: Summary of Care

Objective

The EP who transitions their patient to another setting of care or provider of care or refers their patient to another provider of care should provide a summary care record for each transition of care or referral.

Measure

This objective has multiple measure criteria and requires the provider to meet all thresholds for credit. For more information, refer to Core 15-1, Core 15-2, and Core 15-3.

Core 15-1

Measure

The EP who transitions or refers their patient to another setting of care or provider of care provides a summary of care record for more than 50 percent of transitions of care and referrals.

Denominator

Referrals are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks					
At least one outgoing referral has been printed, faxed, or transmitted electronically using JTN (Join the Network) during the reporting period.	 Record this information from the following locations: Progress Notes > Treatment > Outgoing Referral > Send Referral > Print, Print with attachment(s), Fax, or Fax with attachment(s) Progress Notes > Treatment > Outgoing Referral > green arrow next to the Send Referral button > Send Electronically Progress Notes > green arrow next to Fax button > Fax Consult Notes T quick-launch link > Send eCW P2P Patient Record T quick-launch link > Send eCW P2P Referral/Consult Telephone/Web Encounter > Virtual Visit > Treatment > Outgoing Referral > Send Referral > Print, Print with attachment(s), Fax, Fax with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), or green arrow next to the Send Referral > Dutgoing > New > Send Referral > Print, Print with attachment(s), Fax, Fax with attachment(s), or green arrow next to the Send Referral button and Send Electronically 					
	excluded from this denominator using settings on the MAQ Dashboard: eClinicalWorks MAQ Provider Measure Configuration Provider Settings Provider Settings Provider Settings Exclude Outpoing Referals sent to providers within the same eClinicalWorks database for the denominator calculations of the Summary of Care measure (Stage 2: Core-15) and the Transition of Care Summary measure (Stage 2: Core-15) and the Transition of Care Summary measure (Stage 1: 001-3041) IMPORTANT! Referrals are only counted for a provider if they are listed as th From provider on the referral.	• Yes * No • Yes * No • Yes * No				

Numerator

Referrals that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
At least one outgoing referral has been printed, faxed, or transmitted with attachments during the reporting period.	 Record this information from the following locations: Progress Notes > Treatment > Outgoing Referral > Send Referral > Print with attachment(s) or Fax with attachment(s) Progress Notes > Treatment > Outgoing Referral > green arrow next to the Send Referral button > Send Electronically T quick-launch link > Send eCW P2P Patient Record T quick-launch link > Send eCW P2P Referral/Consult Telephone/Web Encounter > Virtual Visit > Treatment > Outgoing Referral > Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Dutgoing Referral > Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), or green arrow next to the Send Referral > Print with attachment(s), Fax with attachment(s), or green arrow next to the Send Referral button and Send Electronically
	IMPORTANT! For the electronic transmission of summary of care records (Core Measure 15), transactions must be sent to and from a Direct Address. For more information, refer to Requesting a Direct Address. Non-eCW providers can go to <u>http://www.jointhenetwork.com</u> to request an eClinicalWorks-issued Direct Address.

Exclusions

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They transfer patients to another setting or refer patients to another provider less than 100 times during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 15-1

The following features are related to Core Measure 15-1:

- Sending Referrals
- Sending Referrals with Attachments

Sending Referrals

Core 15-2

Measure

The EP who transitions or refers their patient to another setting of care or provider of care provides a summary of care record for more than 10 percent of such transitions and referrals either (a) electronically transmitted using CEHRT to a recipient or (b) where the recipient receives the summary of care record via exchange facilitated by an organization that is a NwHIN Exchange participant or in a manner that is consistent with the governance mechanism ONC establishes for the NwHIN.

Denominator

Referrals are included in the denominator if they satisfy the following criteria:

Denominato r Criteria	Area to Document within eClinicalWorks	
At least one outgoing referral has been printed, faxed, or transmitted electronically using JTN (Join the Network) during the reporting period.	 Record this information from the following locations: Progress Notes > Treatment > Outgoing Referral > Send Referral > Print attachment(s), Fax, or Fax with attachment(s) Progress Notes > Treatment > Outgoing Referral > green arrow next to Referral button > Send Electronically Progress Notes > green arrow next to Fax button > Fax Consult Notes T quick-launch link > Send eCW P2P Patient Record T quick-launch link > Send eCW P2P Referral/Consult Telephone/Web Encounter > Virtual Visit > Treatment > Outgoing Referral > Print, Print with attachment(s), Fax, Fax with attachment(s), arrow next to the Send Referral button and Send Electronically Patient Hub > Referrals > Outgoing > New > Send Referral > Print, Print attachment(s), Fax, Fax with attachment(s), or green arrow next to the Referral button and Send Electronically 	ral > Send or green
	Note: Fax consult notes and/or referrals sent from within the same database excluded from this denominator using settings on the MAQ Dashboard: eClinicalWorks MAQ Provider Measure Configuration Provider Settings Exclude Outgoing Referals sent to providers within the same eClinicalWorks database for the denominator calculations of the Summary measure (Stage 1: 08)-3041) Exclude "Tax Consult Notes" from the denominator calculations of the Summary of Care measure (Stage 2: Core-15) and the Transition of Care Summary measure (Stage 1: 08)-3041)	se can be
	IMPORTANT! Referrals are only counted for a provider if they are listed as <i>From</i> provider on the referral.	the <i>Referral</i>

Numerator

Referrals that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They were transmitted through the P2P Portal with a medical summary, CCR/CCD, and Progress Notes attached	 Record this information from the following locations: T quick-launch link > Send eCW P2P Patient Record > Attachments > Send T quick-launch link > Send eCW P2P Referral/Consult > Attachments or green arrow next to the Send Referral button and Send Electronically Telephone/Web Encounter > Virtual Visit > Treatment > Outgoing Referral > Attachments > Send Referral or green arrow next to the Send Referral s > Outgoing > New > Attachments > Send Referral or green arrow next to the Send Referral button and Send Electronically
	IMPORTANT! For the electronic transmission of summary of care records (Core Measure 15), transactions must be sent to and from a Direct Address. For more information, refer to Requesting a Direct Address. Non-eCW providers can go to <u>http://www.jointhenetwork.com</u> to request an eClinicalWorks-issued Direct Address.

Exclusions

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They transfer patients to another setting or refer patients to another provider less than 100 times during the reporting period.	This exclusion criteria is reported by self-attestation.

Features Related to Core 15-2

Core 15-3

Measure

An EP must satisfy one of the following criteria:

- Conducts one or more successful electronic exchanges of a summary of care document, as part of which is counted in "measure 2" (for EPs the measure at §495.6(j)(14)(ii)(B) with a recipient who has EHR technology that was developed designed by a different EHR technology developer than the sender's EHR technology certified to 45 CFR 170.314(b)(2).
- Conducts one or more successful tests with the CMS designated test EHR during the EHR reporting period.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

IMPORTANT! For the electronic transmission of summary of care records (Core Measure 15), transactions must be sent to and from a Direct Address. For more information, refer to Requesting a Direct Address.

Non-eCW providers can go to <u>http://www.jointhenetwork.com</u> to request an eClinicalWorks-issued Direct Address.

To request a match to a CMS-designated test EHR:

- 1. Go to https://ehr-randomizer.nist.gov.
- 2. Click Register.

The Create Account page opens:

lome Register Reset Password		
Create Accou	nt	
Company	Your Practice Name	~
First name	First Name	
Last name	Last Name	~
Username	Yourusername	
Password	•••••	~
Confirm Password	•••••	
Email	your@regularemail.com	~

- 3. Fill out the fields here and click *Create account*.
- Once your account is created, click *Login* in the top-right corner. The Login pop-up window opens.
- Enter your login information and click *Login*.
 The EHR Randomizer Home Page opens.
- 6. Click *My CEHRTs* at the top of the page.

The Manage CEHRTs page opens:

illage oci	HK IS	
ecw	Basic Information	Direct Trust Membership
Add CEHRT	CEHRT Label	Is your CEHRT member of Direct Trust
	ecw 🗸	O Yes
	Direct Email Address O	No
	your@xyz.eclinicaldirect.com	
	Time Zone	
	America/Detroit	
	Developer O	
	eClinicalWorks LLC	

- 7. To create a CEHRT:
 - a. Enter a label of your choosing in the CEHRT Label field.
 - b. Enter the direct address issued to you by eClinicalWorks in the *Direct Email Address* field.
 - c. Select your time zone from the *Time Zone* pick list.
 - d. Select *eClinicalWorks* from the *Developer* pick list.
 - e. Click the No radio button in the Is your CEHRT member of Direct Trust section.
 - f. Click Save.
- 8. Click *My Matches* at the top of the page.

The My Matches page opens.

9. Click Request New Match:

My CEHRTs	My Matches	Vendors CEHRTs

Select	CEHRT eClinical	Norks 🔹 🗸

10. Select the CEHRT for which you want to create a match from the *Select CEHRT* pick list.

Request match

Cancel

11. Click Request match.

Your match is generated:

My Matches

You can here request new matches for your CEHRTs and review previous matches.

Request New Match...

List of matches previously requested

Note: Click the EHR Product listed under "Matched Against" to see details about initiating the test process with this Test EHR

My CEHRT	Date	Matched Against Co	omment
eCW	Jun 17, 2014	iPatientCare EHR	0
eCW	Jun 17, 2014	Medical Information Technology Inc.	0
eCW	Jun 17, 2014	McKesson Paragon with McKesson Quality eMeasures 12 &2.0	¢
eCW	Jun 17, 2014	iPatientCare EHR	0
eCW	Jun 11, 2014	Medical Information Technology Inc.	0

You will receive an e-mail from your match with information on the next steps. eClinicalWorks has already exchanged the necessary trust anchors with these CMS-designated test EHRs.

12. Send a test referral during the preferred times for the following CMS-designated test EHRs:

Vendor	Scheduling	Testing Window	Confirmation*
iPatientCare	Scheduling is not required, but iPatientCare prefers that providers wait for their initial communication by e- mail before sending a test.	 Monday 9:00 AM to 3:00 PM EST Wednesday 9:00 AM to 3:00 PM EST 	Response is by e-mail and within the same day. Contact: Milan Kalola <u>Interoperability@iPatientCare.com</u>
Medical Information Technology (Meditech)	Scheduling is not required, but Meditech prefers that providers send them a follow-up e-mail notifying them that a test was sent.	 Monday 9:00 AM to 4:00 PM Tuesday 9:00 AM to 4:00 PM Wednesday 9:00 AM to 4:00 PM Thursday 9:00 AM to 4:00 PM 	Response is by e-mail, with a screenshot if successful. If the test is unsuccessful Meditech will respond with the reasons why so that the issue can be addressed. Contact: Philip Alcaidinho <u>onc-test-ehr-group@meditech.com</u>

Vendor	Scheduling	Testing Window	Confirmation*
McKesson†	Scheduling is not required, but McKesson prefers that the test is sent within the given testing window.	 Monday 9:00 AM -to 4:00 PM EST Wednesday 9:00 AM to 4:00 PM EST Thursday 9:00 AM to 4:00 PM EST 	Response is by e-mail and usually within the hour if sent during the testing window. McKesson welcomes follow-up calls and e- mails from clients. Contact: Lori Fitzhugh <u>CMSCrossVendorExchange@mckess</u> on.com

*.

This is the information provided on <u>http://ehr-randomizer.nist.gov</u> when this document was published. Please refer to that website for the latest information. If you get McKesson when requesting a match, ensure you have selected *No* when you enter the information for *MyCEHRT*. Continue to request a match until you get iPatientcare or Meditech. **†**.

13. On the day of the test, create a test patient in the eClinicalWorks EMR and check the following boxes on the Past Medical History, Medication Reconciliation, and Problem List windows:

- g. Click OK.
- 15. Send the referral.
- 16. Reply to the e-mail you received when you requested a match from the CMS-designated test EHR, indicating that you sent a referral from "your direct address" on the date and time on which you sent the referral.
- **17.** Receive a confirmation from the CMS-designated test EHR that they received the referral successfully. Save this confirmation for audit purposes.

Exclusions

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They transfer patients to another setting or refer patients to another provider less than 100 times during the reporting period.	This exclusion criteria is reported by self-attestation.

Note: Changes made in the Stage 2 Final Rule state that providers that use the same EHR technology and share a network for which their organization either has operational control of or license to use can conduct one test of the successful electronic exchange of a summary of care document with either a different EHR technology or the CMS-designated test EHR that covers all providers in their organization. For example, if a large group of EPs with multiple physical locations use the same EHR technology and those locations are connected using a network that the group has either operational control of or license to use, then a single test would cover all EPs in that group.

For more information, refer to https://questions.cms.gov/faq.php?faqId=7729.

Core 16: Submitting Electronic Data to Immunization Registries

Objective

Capability to submit electronic data to immunization registries or immunization information systems except where prohibited, and in accordance with applicable law and practice.

Measure

Successful ongoing submission of electronic immunization data from CEHRT to an immunization registry or immunization information system for the entire EHR reporting period.

Note: At a minimum, you must register with your registry within the first 60 days of the start of the reporting period and follow their testing procedures.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Feature	Area to Document within eClinicalWorks
Ongoing submissions originally achieved in a prior year using HL7 2.3.1 that are continuing.	EMR > Immunizations/Therapeutic Injections > Immunizations Registry > Export Immunizations
 A registration of intent within 60 days of the beginning of the reporting period and meet at least ONE of the following criteria: Awaiting an invitation to begin testing. Engaged in testing. Ongoing submissions using HL7 2.5.1. 	Contact your state immunization registry.
	Note: eClinicalWorks provides registry interfaces to practices in many states. The process details vary slightly based on individual state requirements. Contact eCW Support for more information about immunization registry interface for a specific state.

Exclusion

Providers may be excluded from this measure if they meet at least ONE of the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They do not administer any immunizations during the EHR reporting period.	This exclusion criteria is reported by self-attestation.
Their immunization registry does not provide timely information on their capacity to receive immunization data.	
Their registry is not able to accept the HL7 2.5.1 standard.	
Their registry is not enrolling new eligible providers on the HL7 2.5.1 standard.	

Features Related to Core 16

The following features are related to Core Measure 16:

Exporting Immunizations

Exporting Immunizations

EMR > Immunizations/Therapeutic Injections > Immunizations Registry > Export Immunizations

Core 17: Use Secure Electronic Messaging

Objective

Use secure electronic messaging to communicate with patients on relevant health information.

Measure

A secure message was sent using the electronic messaging function of CEHRT by more than 5 percent of unique patients (or their authorized representatives) seen by the EP during the EHR reporting period.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

5. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy at least ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
They have sent any message from the Patient Portal to the provider during the EHR reporting period.	 Record this information from the following locations: Admin band > Patient Portal Settings icon > Menu Settings > select Show from drop-down lists Patient Portal > Messages or Appointments
They have confirmed or canceled a voice appointment reminder message from the practice.	 Configure options related to this measure from the following locations: Admin band > Messenger icon > Visit Status Mapping Admin band > Messenger icon > Voice Logs > select Appointment from the Message Type drop-down list Record this information from the following locations: Practice band > Resource Scheduling icon > open an appointment > Visit Status Practice band > Provider Schedule icon > open an appointment > Visit Status
	Note: For more information on how to use these features, refer to the <i>eClinicalWorks Messenger Guide</i> or the HelpHub.

Exclusion

Providers may be excluded from this measure if they meet at least ONE of the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have no office visits during the EHR reporting period	This exclusion criteria is reported by self-attestation.
They conduct 50 percent or more of their patient encounters in a county that does not have 50 percent or more of its housing units with 3Mbps broadband availability, according to the latest information available from the FCC on the first day of the EHR reporting period.	This exclusion criteria is reported by self-attestation. Information on broadband availability can be found at: <u>http://www.broadbandmap.gov/</u>

Features Related to Core 17

The following features are related to Core Measure 17:

- Recording Appointments
- Recording E&M Codes
- Configuring Patient Portal Menu Settings
- Sending Messages for Patients
- Configuring eClinicalWorks Messenger
- Recording Visit Status

Recording Appointments

Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment

Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment

Recording E&M Codes

Progress Notes > Visit Code > Add E&M

MENU SET MEASURES

3 of the following 6 objectives must be satisfied to fulfill the Meaningful Use requirements.

- Menu 1: Submitting Electronic Syndromic Surveillance
- Menu 2: Electronic Notes
- Menu 3: Imaging Results
- Menu 4: Family Health History
- Menu 5: Identify and Report Cancer Cases
- < Menu 6: Specialized Registry

Note: While there are exclusions provided for some of the Menu Set objectives, users cannot select one of these objectives and claim the exclusion if there are other Menu Set objectives that they can report on instead.

Selection Suggestion

- The two measures that most providers find the easiest to meet are:
 - Menu 2: Electronic Notes
 - Menu 4: Family Health History
- Providers should first see if they can claim an exclusion for all four remaining measures. If so, attest with
 the two measures listed above and claim an exclusion for any other measure.
- If exclusions cannot be claimed for all remaining measures, start with Menu 3: Imaging Results to see if you can meet that measure. If not, check with your state to see if they accept Syndromic Surveillance data. If they do, attest for Menu 1: Submitting Electronic Syndromic Surveillance. If they do not accept this data, attest for Menu 6: Specialized Registry.
- In cases where you cannot claim an exclusion from other Menu Set Measures and you are not able to meet them (*e.g.*, you diagnose cancer and there is a cancer registry in your state but you cannot meet the measure as eCW is not supporting a cancer registry OR you have access to imaging results but are not able to meet the measure *i.e.*, access imaging results from CEHRT), then you should satisfy this measure by registering your intent for on-going submission within the first 60 days of the reporting period with Dartnet.info.

For more information on Dartnet.info, refer to What is Dartnet.info?.

Menu 1: Submitting Electronic Syndromic Surveillance

Objective

Capability to submit electronic syndromic surveillance data to public health agencies except where prohibited, and in accordance with applicable law and practice.

Measure

Successful ongoing submission of electronic syndromic surveillance data from CEHRT to a public health agency for the entire EHR reporting period.

Note: At a minimum, you must register with your registry within the first 60 days of the start of the reporting period and follow their testing procedures.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Feature	Area to Document within eClinicalWorks
Ongoing submissions originally achieved in a prior year using HL7 2.3.1 that are continuing.	Each state has its own rules for syndromic surveillance. Please contact your state's call center for more information. Open a support case to determine the scope and the cost of an interface with your chosen public health agency.
 A registration of intent within 60 days of the beginning of the reporting period and meet at least ONE of the following criteria: Awaiting an invitation to begin testing. Engaged in testing. Ongoing submissions using HL7 2.5.1. 	

Exclusions

Providers may be excluded from this measure if they meet at least ONE of the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They do not collect ambulatory syndromic surveillance information.	This exclusion criteria is reported by self-attestation.
Their public health agency does not provide timely information on their ability to accept electronic submissions.	

Exclusion Criteria	Area to Document within eClinicalWorks
Their public health agency is not capable of receiving electronic syndromic surveillance data.	
Their public health agency capable of receiving electronic submissions is not able to add any providers to their enrollment.	

Menu 2: Electronic Notes

Objective

Record electronic notes in patient records.

Measure

Enter at least one electronic Progress Notes created, edited, and signed by an EP for more than 30 percent of unique patients with at least one office visit during the EHR Measure reporting period. The text of the electronic note must be text searchable and may contain drawings and other content.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
Their data is entered in at least ONE of the following sections of the Progress Notes (HPI, ROS, Treatment, or Procedures.	 Record this information from the following locations: Progress Notes > HPI > select category > enter c/o, denies, duration, or notes Progress Notes > ROS > select category > enter presence or notes Progress Notes > Treatment > enter medications, labs, diagnostic imaging tests, procedures, outgoing referrals, or use eCliniSense
	 Progress Notes > Procedures > select category > enter notes

Menu 3: Imaging Results

Objective

Imaging results consisting of the image itself and any explanation or other accompanying information are accessible through CEHRT.

Measure

More than 10 percent of all tests whose result is one or more images ordered by the EP during the EHR reporting period are accessible through CEHRT.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
Their order date and result date are during the reporting period and they are marked as Received from the Diagnostic Imaging window.	 Record this information from the following locations: Progress Notes > Diagnostic Imaging Progress Notes > Treatment > Browse in the Diagnostic Imaging section Telephone/Web Encounter > Labs/DI tab > Imaging > New Telephone/Web Encounter > Virtual Visit tab > Diagnostic Imaging Telephone/Web Encounter > Virtual Visit tab > Treatment > Browse in the Diagnostic Imaging section Patient Hub > DI > New

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy at least ONE of the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
A diagnostic image is attached to the test from the Document Details window.	 Record this information from the following locations: Documents > Document Details > select a patient > open a document > Attached To Documents > Document Details > select a patient > open a document > Browse next to the Tag field > highlight the DI IMAGE tag > OK
	IMPORTANT! You must use DI IMAGE tag for this result to count in numerator for this measure.
	Note: There are no limitation on the resolution of the diagnostic image.
	Note: Diagnostic images and imaging results that are scanned into the CEHRT may be counted in the numerator for this measure.

Numerator Criteria	Area to Document within eClinicalWorks
An indication that an image is accessible to the provider through the EHR is entered from the Diagnostic Imaging window	 Record this information from the following locations: EMR > Labs/DI/Procedures > Diagnostic Imaging > highlight a DI and click Attribute Codes > New > Image Accessible L jellybean > Imaging > click a DI order > enter Y or Yes in the yellow row in the Image Accessible column Progress Notes > click a DI link under the Treatment heading > enter Y or Yes in the yellow row in the Image Accessible column Progress Notes > Diagnostic Imaging > click a DI link under the Diagnostic Imaging heading > enter Y or Yes in the yellow row in the Image Accessible column Progress Notes > Diagnostic Imaging > click a DI link under the Diagnostic Imaging heading > enter Y or Yes in the yellow row in the Image Accessible column Progress Notes > right Chart Panel (ICW) > Labs/DI tab > click a DI > enter Y or Yes in the yellow row in the Image Accessible column Patient Hub > DI > click a DI order > enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Labs/DI tab > Imaging > open a DI order > enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Virtual Visit tab > click a DI link under the Treatment heading > open a DI order enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Virtual Visit tab > click a DI link under the Treatment heading > open a DI order enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Virtual Visit tab > click a DI link under the Diagnostic Imaging heading > enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Virtual Visit tab > click a DI link under the Diagnostic Imaging heading > enter Y or Yes in the yellow row in the Image Accessible column Telephone/Web Encounter > Virtual Visit tab > click a DI link under the Diagnostic Imaging heading > enter Y or Yes in the yellow row in the Image Accessible colu
	Accessible. The attribute code must be entered as Image Accessible. The entry into the yellow grid under Image Accessible must either be Y or Yes for this result to count in the numerator for this measure.
A diagnostic imaging result with a link to the image (PACS Interface) is attached.	Documents > Document Details > select a patient > open a document > paperclick link (PACS Interface)

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have ordered less than 100 tests whose result is an image during the EHR reporting period.	This exclusion criteria is reported by self-attestation.
They have no access to electronic imaging results at the start of the EHR reporting period.	

Features Related to Menu Set 3

The following features are related to Menu Set Measure 3:

- Recording Diagnostic Imaging Tests
- Attaching Diagnostic Imaging Tests
- Configuring the Diagnostic Image Tag

Menu 4: Family Health History

Objective

Record patient family health history as structured data.

Measure

More than 20 percent of all unique patients seen by the EP during the EHR reporting period have a structured data entry for one or more first-degree relatives.

Denominator

Patients are included in the denominator if they satisfy the following criteria:

Denominator Criteria	Area to Document within eClinicalWorks
They have had an outpatient appointment with a valid CPT* code created for them with an eligible professional during the reporting period.	 Record this information from the following locations: Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment OR Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment Progress Notes > Visit Code > Add E&M

*. CPT copyright 2014 American Medical Association. All rights reserved.

Numerator

Patients that satisfy the denominator are included in the numerator if they satisfy the following criteria:

Numerator Criteria	Area to Document within eClinicalWorks
Family history for one or more of their first-degree relative is recorded as structured data from the Family History window.	 Record this information from the following locations: Progress Notes > Family History > Customize > Add Progress Notes > Family History > select the statuses of family members and enter any applicable diagnoses
	Note: A diagnosis for Unknown Family History also satisfies this measure and can be captured using the ICD code V49.89 or any dummy ICD code as long as it is mapped to SNOMED 407559004. If there is no known family history for a patient, you can use any dummy ICD code and map it to SNOMED 160266009.
	 Note: The following ICD and SNOMED-CT codes are available by default on V 10: 250.00 (Diabetes) - 73211009 401.9 (Hypertension) - 59621000 429.9 (Heart Disease) - 56265001 434.91 (Stroke) - 432504007 310.9 (Mental Illness) - 192069009 199.1 (Cancer) - 363346000 SNOMED-CT codes for various diagnoses can be looked up from here: https://uts.nlm.nih.gov/snomedctBrowser.html To use this browser, you must first register from here: https://uts.nlm.nih.gov//license.html

Exclusion

Providers may be excluded from this measure if they meet the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They have no office visits during the EHR reporting period	This exclusion criteria is reported by self-attestation.

Features Related to Menu Set 4

The following features are related to Menu Set Measure 4:

- Recording Appointments
- Recording E&M Codes
- Mapping ICD Codes with SNOMED Codes
- Recording Family History

Recording Appointments

Practice band > Resource Scheduling icon > right-click on appointment slot > New Appointment

Practice band > Provider's Schedule icon > right-click on appointment slot > New Appointment

Recording E&M Codes

Menu 5: Identify and Report Cancer Cases

Objective

Capability to identify and report cancer cases to a public health central cancer registry, except where prohibited, and in accordance with applicable law and practice.

Measure

Successful ongoing submission of cancer case information from CEHRT to a public health central cancer registry for the entire EHR reporting period.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Note: eClinicalWorks Version 10 is a 2014 CEHRT complete EHR and has chosen not to certify for this Menu Set measure as it was optional for certification. Providers that diagnose cancer in a state that accepts cancer data, should report on one of the following measures:

- Menu 1: Submitting Electronic Syndromic Surveillance
- Menu 3: Imaging Results
- Menu 6: Specialized Registry

Feature	Area to Document within eClinicalWorks
Ongoing submissions originally achieved in a prior year that are continuing.	Contact your state registry.
 A registration of intent within 60 days of the beginning of the reporting period and meet at least ONE of the following criteria: Awaiting an invitation to begin testing. Engaged in testing. Ongoing submissions 	In cases where you cannot claim an exclusion from other Menu Set Measures and you are not able to meet them (<i>e.g.</i> , you diagnose cancer and there is a cancer registry in your state but you cannot meet the measure as eCW is not supporting a cancer registry OR you have access to imaging results but are not able to meet the measure <i>i.e.</i> , access imaging results from CEHRT), then you should satisfy this measure by registering your intent for on-going submission within the first 60 days of the reporting period with Dartnet.info. For more information on Dartnet.info, refer to What is Dartnet.info?.
	Note: At a minimum, you must register with your registry within 60 days of the start of your reporting period and follow their testing procedures.

Exclusions

Providers may be excluded from this measure if they meet at least ONE of the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They do not diagnose or directly treat cancer.	This exclusion criteria is reported by self-attestation.
They operate in a jurisdiction for which no public health agency is capable of receiving electronic cancer case information in the specific standards required for CEHRT at the beginning of their EHR reporting period.	
They operate in a jurisdiction where no PHA provides information timely on capability to receive electronic cancer case information.	
They operate in a jurisdiction for which no public health agency that is capable of receiving electronic cancer case information in the specific standards required for CEHRT at the beginning of their EHR reporting period can enroll additional EPs.	

Menu 6: Specialized Registry

Objective

Capability to identify and report specific cases to a specialized registry (other than a cancer registry), except where prohibited, and in accordance with applicable law and practice.

Measure

Successful ongoing submission of specific case information from CEHRT to a specialized registry for the entire EHR reporting period.

IMPORTANT! No denominator/numerator calculations are required for this measure. This measure is reported through self-attestation.

Providers must attest Yes to successfully submitting specific case information from CEHRT to a specialized registry for the entire reporting period to meet this measure. In order to attest Yes, Providers must meet ONE of the following criteria:

Criteria	Action
An ongoing submission has already been achieved for an EHR reporting period in a prior year and continues throughout the current EHR reporting period.	 Identify if your state or national specialty society has a specialized registry. If your state has a specialized registry, you must register your intent within the first 60 days of the reporting period.
A registration with the PHA (or other body to whom the information is being submitted) of intent to initiate ongoing submission was made by the deadline (within 60 days of the start of the EHR reporting period) and ongoing submission was achieved	 If your state does not have a specialized registry, please verify with your national specialty society to see if they have or are sponsoring a specialized registry. If so, register your intent within the first 60 days of the reporting with <u>Dartnet.info</u> (as this is our preferred registry). If neither your state nor your specialty society has a specialized registry, you can claim an exclusion. In cases where you cannot claim an exclusion from other Menu Set Measures and you are not able to meet them (e.g. you)
A registration of intent to initiate ongoing submission was made by the deadline and the EP or hospital is still engaged in testing and validation of ongoing electronic submission.	diagnose cancer and there is a cancer registry in your state but you cannot meet the measure as eCW is not supporting a cancer registry OR you have access to imaging results but are not able to meet the measure <i>i.e.</i> , access imaging results from CEHRT), then you should satisfy this measure by registering your intent for on-going submission within the first 60 days of the reporting
A registration of intent to initiate ongoing submission was made by the deadline and the EP or hospital is awaiting an invitation to begin testing and validation.	period with Dartnet.info. For more information on Dartnet.info, refer to What is Dartnet.info?.

Exclusions

Providers may be excluded from this measure if they meet at least ONE of the following criteria:

Exclusion Criteria	Area to Document within eClinicalWorks
They do not diagnose or directly treat any disease associated with a specialized registry sponsored by a national specialty society for which the EP is eligible, or the public health agencies in their jurisdiction.	This exclusion criteria is reported by self-attestation.
They operate in a jurisdiction for which no specialized registry sponsored by a public health agency or by a national specialty society for which they are eligible is capable of receiving electronic specific case information in the specific standards required by CEHRT at the beginning of their EHR reporting period.	
They operate in a jurisdiction where no public health agency or national specialty society for which they are eligible provides information in a timely manner on their capability to receive information into their specialized registries.	
They operate in a jurisdiction for which no specialized registry sponsored by a public health agency or by a national specialty society for which they are eligible is capable of receiving electronic specific case information in the specific standards required by CEHRT at the beginning of their EHR reporting period can enroll additional providers.	

What is Dartnet.info?

The *DI Practice Performance Registry* compiles and processes EHR data in order to provide a graphical view of how organizations and practices are doing on specific measures and how they compare to other organizations/ practices.

The DI Practice Performance Registry has been endorsed by the <u>American Academy of Family Physicians</u> as a *Quality Improvement Registry*. It also meets Stage 2 Meaningful Use Menu Set Measure 6 requirements, specifically: Successful ongoing submission of specific case information from a certified EHR technology to a specialized registry for the entire EHR reporting period.

Contact them by e-mail at DIRgistry@dartnet.info to register your intent.

For providers reporting for Q4, the deadline to register their intent is 26th Nov. The process takes several days to complete, so initiate them at the earliest.

MEANINGFUL USE STAGE 2 AUDIT TOOLKIT

This document provides suggestions for eClinicalWorks clients to prepare for a potential Meaningful Use audit. Auditors may need more information on a case-by-case basis. In such circumstances, contact eClinicalWorks Support for additional assistance.

Meaningful Use Audits

Providers who receive an EHR incentive payment for Stage 2 of the Medicare or Medicaid EHR Incentive Program may potentially be subject to an audit. Eligible professionals (EPs) and eligible hospitals should retain *all* relevant supporting documentation (in either paper or electronic format) used in the completion of the Attestation Module responses.

Documentation to support attestation data for Stage 2 Meaningful Use objectives and Clinical Quality Measures (CQMs) should be retained for six years post-attestation.

Overview of Meaningful Use in 2015

Regardless of the stage/year of MU, EPs must demonstrate MU for a three-month period on 2015.

Medicare EPs beyond their first year must attest a Calendar Quarter- Q1, Q2, Q3, or Q4

Medicaid EPs must attest any 90 days in 2014.

To document proof of compliance for percentage-based measures:

 As proof of use of a Certified Electronic Health Record Technology system, provide invoices or a copy of your licensing agreement with the vendor. Please ensure that the licensing agreements or invoices identify the vendor, product name, and product version number of the Certified Electronic Health Record Technology system utilized during your attestation period. If the version is not present on the invoice/ contract, please supply a letter from your vendor attesting to the version number used during your attestation period.

Request an EHR verification letter by opening a case with eClinicalWorks Support. Indicate the reporting period, stage on which you are reporting, and the number of providers on which you are reporting:

Product Categories*			Product Area*	Support Issue*

- 2. Provide a response to the following questions:
 - a. At how many offices or other outpatient facilities do you see your patients?
 - **b.** List each office or other outpatient facility where you see patients and indicate whether or not you utilize Certified Electronic Health Record Technology in each office or other outpatients facility:

#	Office or Other Outpatient Facility	Utilize CEHRTS?
1		
2		
3		

- c. If you utilize more than one office or other outpatient facility, supply documentation which proves that 50% or more of your patient encounters during the EHR reporting period have been seen in offices or outpatient facilities where you utilize a CEHRT system.
- d. Do you maintain any patient records outside of your CEHRT system?

If yes, supply documentation which proves that more than 80% of the medical records of unique patients seen during the attestation period are maintained in a CEHRT system at each office or other outpatient facility where CEHRT system is being used.

Core Measures

Use the following workflow suggestions to document proof of compliance for self-attestation measures. All necessary screenshots should be taken three times: at the beginning, middle, and end of the reporting period.

The following self-attestation Core Measures are covered in this document:

- Attesting to Core Set Objectives
- Protect Electronic Health Information
- Generate Lists of Patients by Specific Conditions
- Exchange Summary of Care Record at Each Transition of Care to EP on Another CEHRT or with a CMS-Designated EHR
- Capability to Submit Electronic Data to Immunization Registry
- Clinical Decision Support Rule

Attesting to Core Set Objectives

For Core Measures # 1, 2, 3, 4, 5, 7, 8, 10, 12, 13, 14, 15 (1 and 2), and 17 provide the supporting documentation (in either paper or electronic format) used in the completion of the Attestation Module responses (*e.g.*, a report from your EHR system that ties to your attestation). This documentation should include the numerator and denominator for each measure, as well as the date range and the EP's name or NPI.

Note: If you are providing a summary report from your EHR system as support for your numerators/ denominators, please ensure that we can identify that the report has actually been generated by your EHR (*e.g.*, your EHR logo is displayed on the report, or step-by-step screenshots which demonstrate how the report is generated by your EHR are provided).

To document proof of compliance for percentage-based measures:

- 1. From the MAQ Dashboard, click Stage 2 in the left pane, then click Core.
- 2. From the Select View pick list, click Score Card:

arc Select Pro	vider(s)	Score Card	Ŧ	Select Help 🚽
		Select View Monthly	•	
Practice (Threshold %) Period A	Practice Denominat Period B	Calendar Year 90-Day QTD QTR	=	nctice nreshold %) riod B

Protect Electronic Health Information

For this measure, you will need to provide documentation to CMS proving that you completed a security risk analysis (SRA). When you perform your SRA you should have a checklist of things to complete for it. Keep a copy of this checklist report.

Security attributes, Rx security, P.S.A.C. categories and permissions, authentication settings, admin logs, confidential Progress Notes, and confidential patient accounts are available from eClinicalWorks to satisfy this measure. For more information on how to use these features, refer to the *System Administration Users Guide* or the HelpHub.

Note: Regardless of whether a practice is locally hosted or hosted in the cloud, a Security Risk Assessment must be conducted

Generate Lists of Patients by Specific Conditions

1. From the *Registry* band, click *Registry Reports*.

The Registry Reports List window opens.

2. Check the box next to the saved report and click Run Report (Excel):

Registry Reports -								
Reg	istry Repor	ts List Reports	4					
							_	Run Report (Datel)
EHK.	Note:	Phivsheet Name	Folcy Start date	Policy End date	Upload Freis	Report Shiet data	Report End date	Deleta
r –	aneari							•
0	bmi							
F	dabetes							0

The report is exported to an Excel spreadsheet. Keep a copy of this report.

If you are using the Analyze Data button in the Registry dashboard:

1. When the report is run, click *Analyze Data*:

Exchange Summary of Care Record at Each Transition of Care to EP on Another CEHRT or with a CMS-Designated EHR

As part of Meaningful Use Stage 2's Transition of Care measure eligible professionals (EPs) and eligible hospitals/critical access hospitals (CAHs) are required to perform one of the following actions:

- Conduct one or more successful electronic exchanges of a summary of care document, with a recipient who has EHR technology designed by a different EHR technology developer than the sender's.
- Conduct one or more successful tests with the CMS-designated test EHR during the EHR reporting period

The EHR Randomizer supports the testing of exchanges with a designated test EHR. If you successfully exchanged a Summary of Care document with at least one provider with a different EHR than yours and documented that exchange, you do not need to use this website for the test exchange measure.

For support and assistance, post a message on the ehr-randomizer group.

MEANINGFUL USE STAGE 2 AUDIT TOOLKIT

Perform one of the following actions to collect the require documentation to demonstrate that you have met this requirement:

• Exchange a Summary of Care by a referral through P2P (including CCR/CCD):

	The state (april	01.0			In the second second
Patient	John, Chris (AB11	914)		Sei Into	Hub Hub
Insurance	CCA			Sel Pt	Ins POS 11
Ref From	Willis, Sam		Ref To Provider		Pref Clear

Open Cases		× N	Assigned To Billin	ng , Biling	·
Appt Date	11/26/2013		Unit Type	/ISIT)	-
eceived Date	11/26/2013		Status	Open C Consu	t Pending C Addressed
Priority	Routine	•			•
Diagnosis	/ Reason	Visit Details		Notes	Structured Data
Reason Sl. No	Description			Add	Browse Remove
Diagnosis Code	Previous D <u>x</u> Name	Add Remo	Procedu	res Name	Add Remove
Diagnosis Code	Previous D <u>x</u> Name	∫_Add Remo	We Procedu	res Name	Add Remove

• Exchange a Summary of Care with a different EHR than the one they are using for Meaningful Use.

Keep documentation for your records when you send a Summary of Care record to a provider that is using a different EHR.

You should receive an e-mail within 24 hours after the registration process from the test EHR indicating that the test was successful. Once you receive confirmation that the CCDA was received, you have successfully completed your test.

Meaningful Use Stage 2 Core 15-3 Summary of Care – Randomizer Tool Unable to Find a Match – CMS.Gov

[EHR Incentive Programs] When reporting on the Summary of Care objective in the Electronic Health Records (EHR) Incentive Program, how can a provider meet measure 3 if they are unable to complete a test with the CMS designated test EHR (Randomizer)?

CMS is aware of difficulties providers are having in use of the CMS Designated Test EHRs (NIST EHR-Randomizer Application) to meet measure 3 of the Summary of Care objective. At this time the two CMS Designated Test EHRs can only exchange/match with an EP that is Direct Trust (DT) Accredited. There is not a non-DT Accredited Test EHR for providers to use to successfully complete the test.

The following actions are currently in place to meet the Summary of Care objective for measure 3:

 Exchange a summary of care with a provider or third party who has different CEHRT as the sending provider as part of the 10% threshold for measure #2. A successful exchange in measure #2 allows the provider to meet the criteria for measure #3 without the need to conduct a test with the Randomizer as outlined in measure #3, or

2. Conduct at least one successful test with the CMS designated test EHR (if the provider is Direct Trust Accredited).

If the provider does not exchange summary of care documents with recipients using a different CEHRT in common practice, and cannot use the CMS Designated Test EHR for the reasons outlined above, the provider may retain documentation on their circumstances and attest Yes to meeting measure #3 if they have and are using certified EHR which meets the standards required to send a CCDA (§ 170.202).

This exchange may be conducted outside of the EHR reporting period timeframe but must take place no earlier than the start of the year and no later than the end of the year or the provider attestation date whichever occurs first. For example, a EP who is reporting Meaningful Use for a 90-day EHR reporting period may conduct this exchange outside of this 90-day period as long as it is completed no earlier than January 1st of the EHR reporting year and no later than December 31st of the EHR reporting year.

For more information on the NIST EHR-Randomizer Application, please visit: https://ehr-randomizer.nist.gov/ehr-randomizer-app/#/home

Capability to Submit Electronic Data to Immunization Registry

Some practices may be exempt from this measure.

If your state has an immunization interface with eClinicalWorks:

1. From the File menu, click Interface Dashboard:

The Interface Dashboard window opens.

- Click the *Immunizations* tab at the top of the window. The Immunizations options display.
- 3. Click the Outbound tab on the left side of the window.
- 4. Information on immunizations sent from this system displays:

		Inte	rface Dashboard		
		CLINIFAL	PRACTICE HAMAGEHERT	IMPRIMIZATIONS	
				Interface Name	8
MAPPINGS	Date Determer 03/01/3015	And 03/31/2015 1914	tun Sett 🛛 🖌 🖬 Successfully Sent	Todad In Send	Run Report
REPORTS OUTVOLND				Please configure para	eneters and click on "Fun Report"

Note: If it is necessary to go back further than one month, please contact eClinicalWorks Support to obtain logs showing that data.

OR

- If the data submissions failed through the Immunization interface, take a screenshot of this failed submission.
- If you submitted a test HL7 file, provide documentation from your state that your test was successful or unsuccessful.
- If you were unable to submit an HL7 file due to a state unavailability discrepancy, request documentation for this from your state.
- If your state registry is on a different HL7 standard than eClinicalWorks' and you were not able to send a test file, contact eClinicalWorks Support and we will provide you a letter stating that we currently only offer HL7 version 2.5.1.

Note: Only the data for the last month is displayed on the Immunization Dashboard. Any immunization from one to six months old is archived, for which we do not have access.

Clinical Decision Support Rule

Measure 1: CDSS Alerts

If you are meeting five (5) measures related to four (4) or more CDSS alerts:

- 1. To document how the CDSS alerts are set up:
 - a. From the EMR menu, hover over CDSS and click Measure Configuration.

The Measure Configuration window opens:

Quality	Measures		
nabled	Patients see assigned PCG - Do patients see their assigned primary care giver (PCG) ?	NUMERATOR: Number of patients in denominator who have seen their assigned PCG at least once in the last 12 months up to and including the last day of the reporting period	DENOMINATOR: Number of unique patients who were seen in the reporting period, who are not being seen for the first time in the health center
isabled	Chlamydia screening - Chlamydia screening	NUMERATOR: NQF: Patients in the denominator who had at least one Chlamydia test during the measurement year	DENOMINATOR: NQF: Women 16- 25 years of age as of December 31 of the measurement year who are sexually active.
nabled	Sexual history taken - Take a sexual history	NUMERATOR: Patients in the denominator who have had a sexual history taken in the past year	DENOMINATOR: All patients at least 18 years old with at least one visit in the past 12 months up to and including the last day of the reporting period
nabled	Sexual history taken - Take a sexual history	NUMERATOR: Patients in the denominator who have had a sexual history taken in the past year	DENOMINATOR: All patients at least 12-17 years old with at least one visit in the past 12 months up to and including the last day of the reporting period
		NUMERATOR: Number of patients in denominator who have had smoking status identified or	

- **b.** Take a screenshot of this window.
- 2. To take screenshots of the CDSS alerts within the Patient Dashboard:
 - **a.** Open a patient's Progress Notes for an encounter taking place during the attestation period.
 - b. Click the CDSS link in the Patient Dashboard:

c. Take a screenshot of this tab.

Measure 2: Drug/Drug and Drug/Allergy Interaction Check

Documentation for Measure 170.304(a) is different for Multum[®] and Medi-Span[®] drug databases. First, determine which drug database the practice is using, and then use the appropriate procedure to document this measure.

To determine which drug database the practice is using:

- From the Progress Note, and click *Treatment*. The Treatment window opens.
- 2. Click Add:

The Manage Orders window opens:

- 3. From the *Type* pick list, check for one of the following options:
 - Multum Rx
 - Medispan Rx

The option that displays is the drug database that the practice uses.

Multum Drug Database

To document 170.304(a) if the practice uses the Multum Drug Database:

- 1. From the Progress Note, click *Treatment*: The Treatment window opens.
- 2. Click Interactions:

Medi-Span Drug Database

To document 107.304(a) if the practice uses the Medi-Span Drug Database:

 From the *Reports* menu, point to *EMR*, then click *Drug Interaction Logs*. The Drug Interaction Log Report window opens:

D Drug	Interaction Log								
Drug Interaction Log Report									
User	Willis, Sam	 From Date 01/07/2013 	To Date 01/07/2013		Order By 📀 Date 💿 User				
User	Patient	Provider Action	Access Date and Time						
Ignore ((0) OverWrite (0) C	Cancel (0)			No result found.				

- 2. Select the appropriate user from the User pick list.
- Click More (...) next to the *From Date* and *To Date* fields to open pop-up calendars and select a date range.
 The report runs automatically when you make changes to these filter fields.

Menu Set Measures

In 2014, EPs cannot select a Menu Set Measure and claim exclusion for it if there are other Menu Set Measures they can meet. The following Menu Set Measures are covered in this document:

- Capability to Submit Electronic Syndromic Surveillance Data to Public Health Agencies
- Capability to Identify and Report Cancer Cases to a Public Health Central Cancer Registry
- Capability to Identify and Report Specific Cases to Specialized Registry (Other than a Cancer Registry)

Attesting to Measure Set Measures

If attested to Menu Set Measures # 2, 3, or 4, provide the supporting documentation (in either paper or electronic format) used in the completion of the Attestation Module responses (*e.g.*, a report from your EHR system that ties to your attestation). This documentation should include the numerator and denominator for each measure as well as a date range and the EP's name or NPI.

Note: If you are providing a summary report from your EHR system as support for your numerators/ denominators, please ensure that we can identify that the report has actually been generated by your EHR (*e.g.*, your EHR logo is displayed on the report, or step-by-step screenshots which demonstrate how the report is generated by your EHR are provided).

To document proof of compliance for percentage-based measures:

1. From the MAQ Dashboard, click Stage 2 in the left pane, then click Menu.

2. Export the data to a PDF by clicking the floppy disk icon to open a drop-down list, then clicking *Save as PDF*:

0	The survey of th							
	X Seve AS CSV			10.205		1000	100m	and a second

	Period 8110-03-0014 to 12-31-2014		Partial A	Period A	Parind A	Period B	Partial ff	Parried D .
	100	201-2244	407	150		2413	471	
	CPCE - (atamitie evenent)	00133443	334	334		422.1	422.1	

3. Save the file on your desktop.

A message displays confirming that the file was saved successfully.

In the file that is saved on your computer, page 1 displays all the Menu Set measures for your practice:

		Report St.	rt Date: 07	/01/2014

MENU-4	Family Health History	961	54	0	5.62	20.00

eClinicalWorks. All rights reserved

March 11, 2015

Page 2 displays the Menu Set Measures for a specific provider:

Capability to Submit Electronic Syndromic Surveillance Data to Public Health Agencies

If you submitted a test HL7 file, provide documentation from your state that your test was successful or unsuccessful.

If you were unable to submit an HL7 file due to a state unavailability discrepancy, request documentation for this from your state.

If eClinicalWorks is on a different HL7 format than your state registry and you were not able to send your test file, contact eClinicalWorks Support and we will provide you a letter stating that we currently only offer HL7 version 2.5.1.

Capability to Identify and Report Cancer Cases to a Public Health Central Cancer Registry

eClinicalWorks Version 10 is a 2014 CEHRT complete EHR and has chosen not to certify for this measure as it was optional for certification.

Capability to Identify and Report Specific Cases to Specialized Registry (Other than a Cancer Registry)

eClinicalWorks Version 10 is a 2014 CEHRT complete EHR and has chosen not to certify for this measure as it was optional for certification.

CQMs

There are two recommended core sets of CQMs, one for adults, and one for children that focus on high-priority health conditions and best practices for care delivery.

Take a screenshot of the MAQ Dashboard with the CQM data displayed, ensuring that a zero is displayed in the denominator for each measure (or include documents for which the provider qualifies for an exclusion):

Medicaid Meaningful Use

In addition to all the aforementioned requirements, Medicaid attestation requires the Patient Encounter Report. Since eClinicalWorks can only generate the number of patients seen using the eClinicalWorks application, if any patient was seen using paper chart or at another facility, that number must be manually added to the denominator. If the practice has used the eClinicalWorks application only, the numerator would match the denominator for both of the following reports.

IMPORTANT! These are state-specific requirements. Practices should check with their states for specific Medicaid Meaningful Use requirements.

Patient Encounter Report

50% of All Patient Encounters Occurred at a Facility Using Certified EHR Technology

Use the denominator of the Clinical Visit Summaries (encounter - New MU Spec) to get the numerator of this report.

80% of All Unique Patient Encounters Occurred at a Facility Using Certified EHR Technology

Use the denominator of Record Demographics/Active Medication List/Active Medication Allergy List to get the numerator of this report.

Additional Tips

Throughout a Meaningful Use Stage 2 audit, keep the following tips in mind:

- If you have referred to any FAQ from <u>http://questions.cms.gov</u>, keep a copy of that FAQ document.
- Provide supporting documentation for all claimed exclusions.
- Print the PDF Summary at the end of attestation and keep it on file.
- When sending the screenshots to the auditors, black out any identifiable patient health information. If this
 is not possible, use secure messaging to send the screenshots. Ensure that all data sharing with the
 auditors is HIPAA compliant.

For more information about HIPAA compliance, visit: <u>http://www.hhs.gov/ocr/privacy/</u>

APPENDIX A: LIST OF OUTPATIENT CODES

The following is a list of codes that satisfy the objective measures that require a patient to be seen by the EP.

Outpatient

92004, 92002, 92014, 92012, 99024, 99211, 99212, 99213, 99214, 99215, 99201, 99202, 99203, 99204, 99205, 99241, 99242, 99243, 99244, 99245, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, 99420, 99429, 99455, 99456, 90846, 90847, 90853, 90857, 90801, 90804, 90805, 90806, 90807, 90808, 90809, 90802, 90810, 90811, 90812, 90813, 90862, 90960, 90961, 90962, 90966, 90970, G0438, G0439, G0402, D0120, D0140, D0150, 99304, 99305, 99306, 99307, 99308, 99309, 99310, 99315, 99316, 99318, 99391, 99392, 99393, 99356, 99324, 99325, 99326, 99327, 99334, 99335, 99336, 99337, D0120, D0140, D0145, D0150, D0160, D0170, D0180, D1110, D1120, 98940, 98941, 98942, 98943, MUOBV, MUREP, 90785, 90791, 90792, 90832, 90833, 90834, 90836, 90837, 90838, 99495, 99496
